

**Advanced Ceramics and Applications VIII:
New Frontiers in Multifunctional Material Science and Processing**
Serbia, Belgrade, September 23-25th 2019.

ACA Conferences bring together annually leading scientists, engineers, professors, PhD students, experts and manufacturers of advanced ceramics, glasses and refractories to exchange information on their key achievements and research projects. Advanced ceramic plays outstanding role in electronic and information industry, renewable energy utilization, environmental protection, security, space technology, cultural heritage restoration, prosthetics fabrication, etc. ACA Conference has been initiated with an outstanding **Scientific Committee** from well-known institutes/universities across the globe, making it a specially designed cluster conference that covers all aspects and fields of advanced ceramic research.

Serbian Ceramic Society (SCS) was initiated in 1995/1996 and fully registered in 1997 as Yugoslav Ceramic Society. Since 2009, it continues as Serbian Ceramic Society. Serbian Ceramic Society is one of the few Ceramic Societies in the South-Eastern Europe, with members affiliated with more than 20 research institutes and universities, active in 12 sessions.

The Serbia Chapter of the American Ceramic Society was established in 2018 to serve existing ACerS members in the region. Like other international chapters, the mission of the Serbia chapter of ACerS is to collaborate whenever possible with other organizations in the region and throughout the world to better serve the ceramic materials community.
